

BANANA REPUBLIC ICON FRAGRANCE COLLECTION

NEW FRAGRANCES METAL RAIN & GRASSLAND

Banana Republic introduces two new scents to its Icon Collection that transport you to the great outdoors, conjuring thoughts of blue skies and fresh air...

Metal Rain captures the essence of a crisp, snowy mountain top, with streams of glistening water trickling down snow-covered rocks, creating a sense of tranquility and recharge. Woods intertwined with aromatic notes...you'll instantly feel warmth and watery freshness. This fragrance, created by Gino Percontino, was inspired by brisk winter days and the combination of metallic ozone notes.

Grassland redefines charming by transporting you to the countryside surrounded by hilly greens and citrusy fruits. The watery fruity notes on top provide an amazing contrast to the warm, sensual dry down. This fragrance, created by Gino Percontino, is a fresh take on oriental fougere, inspired by a breezy Spring day and fresh cut grass.

75ml Eau de Parfum RRP £55.00
